Both CTCBridge for LEIN and Talon provide you with features you need to access law enforcement data. When you need standard state and federal data access, CTCBridge for LEIN is a great client choice. If you want to increase officer and public safety by allowing personnel to quickly find critical information, ID a person with a driver's license image, and allow them to participate in regional data sharing, Talon is the client for you. Combined with TalonPoint, our Talon clients give you the information arsenal required to help protect our communities.
